Education

- **Seoul National University** Mar. 2022 – present
  Ph.D Candidate in Data Science (Advisor: Min-hwan Oh)
- **Seoul National University** Mar. 2020 – Feb. 2022
  M.S in Data Science (Advisor: Min-hwan Oh)
- **Seoul National University** Mar. 2011 – Feb. 2020
  B.S. in Business Administration

Research Interests

My research combines **online learning** and **choice modeling** to statistically analyze user choices and learn *latent preferences from choice feedback*. I study how these learned preferences can guide **sequential decision-making** in settings such as personalized recommendation. I am also interested in **nonstationary preferences**, including how user preferences evolve *over time and in response to past interactions*, and how learning algorithms can adapt to these changes. More broadly, I aim to develop *principled learning methods* for a wide range of real-world decision-making problems under uncertainty.

Publications (* denotes equal contribution)

5. **Topic-Aware Contextual Cascading Bandits.**
   Hyunjun Choi*, Taehyun Hwang*, and Min-hwan Oh
   *Accepted at Neural Information Processing Systems (**NeurIPS**)*, 2026

4. **Block Optimism for Nonstationary Bandits with Latent Linear Dynamics.**
   Taehyun Hwang*, **Hyunjun Choi***, Heesang Ann*, and Min-hwan Oh
   *Accepted at Neural Information Processing Systems (**NeurIPS**)*, 2026
   • Best Paper Award, Korean Artificial Intelligence Association 2026 Summer Conference

3. **Generalized Linear Bandits with Memory.**
   Heesang Ann*, Hyunjun Choi*, **Taehyun Hwang***, Younghoon Shin, Haeju Cheong, and Min-hwan Oh
   *International Conference on Machine Learning (**ICML**)*, 2026

2. **True Impact of Cascade Length in Contextual Cascading Bandits**
   Hyunjun Choi, Joongkyu Lee, and Min-hwan Oh
   *Advances in Neural Information Processing Systems 38 (**NeurIPS**)*, 2025
   • National Research Foundation of Korea (**NRF**) President's Award, K-Data Science Conference 2025.

1. **Cascading Contextual Assortment Bandits**
   Hyunjun Choi, Rajan Udwani, and Min-hwan Oh
   *Advances in Neural Information Processing Systems 36 (**NeurIPS**)*, 2023
   • National Minister of Science and ICT (**MSIT**) Award, K-Data Science Conference 2023.

Grants

- **Integrating Diversity into Cascading Logistic Bandits.**
  *Ph.D. Student Research Grant, National Research Foundation of Korea (**NRF**)* Sep. 2024 – Aug. 2026

Project Experience

- **Integration of Online and Offline Customer and Brand Data and Development of Contextual Bandit Algorithms for Real-Time Personalized Recommendations.**
  Director: Prof. Min-hwan Oh — Feb. 2025 – Feb. 2026
  Funded by *SK hynix*

- **Defective Equipment Identification in Semiconductor Manufacturing Processes.**
  Director: Prof. Min-hwan Oh — Feb. – Oct. 2021
  Funded by *SHINSEGAE Inc.*

Awards & Honors

- **Best Paper Award**, Korean Artificial Intelligence Association — Aug. 2026
- **NRF President's Award (2nd Prize)**, K-DS Conference Research Presentation — Sep. 2025
- **MIST Award (1st Prize)**, K-DS Conference Research Presentation — Nov. 2023

Teaching Experience

- **Teaching Assistant** at Seoul National University
  Data Science & Reinforcement Learning

Invited Talks & Conference Presentations

"True Impact of Cascade Length in Contextual Cascading Bandits"
- K-DATA SCIENCE Conference Research Presentation, Daegu — Sep. 2025

"Cascading Contextual Assortment Bandits"
- K-DATA SCIENCE Conference Research Presentation, Siheung — Nov. 2023

"Combinatorial Bandits"
- Invited Seminar, SK Telecom — Jun. 2023

"*Soft Contextual Cascading Bandits*"
- INFORMS 2022 Annual Meeting, Indianapolis — Oct. 2022

Academic Service

- **Conference Reviewer**
  ICML (2026)
  NeurIPS (2025, 2026)
  ICLR (2026, 2027)

Outside Academia

- **Muay Thai** (2021–present)
  Practicing sequential decision-making under a different kind of pressure.
